

TOOLS WE LOVE: TECNU CLEANSER

July 2013

The Trees Coalition uses and recommends Tecnu® Cleanser to prevent itching and rash that many people get when they touch poison ivy, poison oak or poison sumac. It is a cleanser that removes the urushiol oils that cause the allergic reaction in 90% of the population, and works well if used within 4-8 hours after exposure. According to the manufacturer, you can wash skin, clothes, tools and pets with this to remove the harmful oils.

We buy the 32 oz bottle and use it to refill the personal size ½ oz bottles to take in the field.

We love it. We are not paid to endorse it.

It is available at drugstores, on Amazon and at www.gemplers.com.
